School Fair Friday

Great interest is being taken
in the school fair which takes
place on Friday of this week,
and keen competition is looked
for in the parade for the Mc
Phail cup, and in the physical
exercises for the Kelly cup.

Given fine weather, it is ex-
pected that there will be a
splendid turnout. Schools are
again reminded to have their
exhibits in early to facilitate
the work of the arranging com-
mittees and judges.

The parade which is sched-
uled for 1 o'clock, will be fol-
lowed by the physical exercises and
a program of sports.

In the evening, following the
picture show, there will be a
dance under the auspices of the
Oyen Orchestra.

World Series Will Start Tuesday October 8

The first game of the 1920
world's baseball series will be
played October 8, on the ground
of the team winning the Na-
tional League pennant.

British Pilot Boasts World's Speed Record To 368 Miles an Hour

CALSHOT, Eng. Sept. 10.—
Squadron Leader A. H. Orlebar,
captain of the British Schneider
Cup team, to day flew the super
machine Rolls-Royce S-6, with
which Waghorn won the
Schneider Cup race for England
last Saturday at a speed of
328.08 miles an hour, to a new
world's record of 368.8 miles an
hour.

Flight Lt. G. H. Stainforth,
member of the British Schne-
der Cup team, also passed Wag-
horn's mark, being officially
clocked at 330 miles an hour.

LEGAL NOTICE

MORTGAGE SALE OF FARM PROPERTY

Pursuant to the directions of the
Registrar, and by virtue of the Powers
of Sale provided by the Land Title
Act, under a certain mortgage which
will be produced at the time of the
sale, there will be offered for sale by
public auction at the Post Office in
the Village of Oyen, in the Province
of Alberta, on Saturday, the 14th day
of October, A.D. 1920, at the hour of
2 o'clock in the afternoon, the follow-
ing property, namely:

The North half of Section 21, Town-
ship 26, Range 4, West of the 11th Meri-
dian, in the said Province, containing
by admeasurement 320 acres, more or
less, reserving thereout all mines and
minerals.

Terms of Sale to be 10 per cent cash
at the time of the sale and the balance
according to the terms and conditions
to be made known at the time of sale
or upon application to the vendor's
solicitors.

The above property will be offered
for sale subject to a sealed reserve bid
and free from all encumbrances save
taxes for the current year.

The vendor is informed that the
above property is situated about 12
miles from Oyen, and one and one-
half miles from a School.

The land consists of 320 acres, 125
acres of which are under cultivation,
and 125 acres additional could be cul-
tivated. There is about 80 acres fen-
ced with two wires. There is one
well on the land.

For further particulars and condi-
tions of sale, apply to Messrs. Newell,
Lindsay, Emery and Ford, Barristers,
Edmonton, Alberta, Vendor's Solici-
tors.

Dated at Edmonton, in the Pro-
vince of Alberta, this 25th day of June,
A.D. 1920.

Approved: W. Forbes,
Registrar

How Do We Do It?

People often wonder how it is we do so much
business. There is nothing strange about it. The
reasons are, we advertise what we have for sale, and
we have for sale what we advertise. The people are
satisfied that they get full value for the money they
leave with us and they Come again.

New Fall and Winter Goods

are arriving every day

Stylish Winter Coats and Sweaters, of contrast-
hues and exclusive colors.

Ladies Winter Coats trimmed with luxurious
furs. Materials are: Black Broadcloth, Indepen-
dence Blue, Beige and Blush Green.

Prices range from \$22.50 to \$47.50.

Ladies' and Men's Jumbo Knit Sweaters in
plain and fancy colors. These sweaters are 100%
pure wool. Prices \$6.50, 8.00 and 10.00.

selves.

Here and There

382.

Canadian Pacific steamer Min-
nesota recently brought over to
Canada two fine stallions belong-
ing to the Prince of Wales, "Ade-
boran" an Arab, and "Crusader" a
Clyde, to go the royal ranch at
High River, Alberta. The two
horses broke their journey at the
Toronto Exhibition, and later were
carried across the Dominion by
Canadian Pacific Express. Special
accommodation was provided for
them on the Minnesota.

Rt. Hon. L. C. M. S. Amery, sec-
retary for the Dominions in the
Baldwin administration, fulfilled
his wish recently when he climbed
Mount Amery, 10,840-foot peak in
the Rockies, to see a peak which
he had travelled some six thou-
sand miles by Canadian Pacific Ex-
press of Australia and line to La-
Louise from England. He fought
his way through blizzards and
many other hardships to the top of
the peak. He was accompanied by
a Swiss guide, Edward Feuz, of
Lake Louise.

"Mr. Churchill looked very funny
wearing one of father's thresh-
ing machines," said the Hon. George
Rodney, aged ten, who with his
younger brother John recently trav-
elled to England to take up school-
ing. Winston Churchill is a cousin
of Lord Rodney who operates a
ranch at Fort Saskatchewan, Al-
berta.

The fourth game refuge has been
established in New Brunswick by
the provincial government at Be-
cancine, consisting of 43 square
miles located in Carleton and York
counties. This makes a total in all
of about 440 square miles of terri-
tory set aside in the province as
game sanctuaries since 1918.

Hon. J. E. Perron, Quebec min-
ister of agriculture, has announced
the loss of two-thirds of the pur-
chase price of pure-bred sheep
without interest charges, to Quebec
farmers. He aims to place 25,000
pure-bred sheep throughout the
province to bring in a yearly re-
venue of \$250,000.

A yield of 2,559,955 barrels of
apples is expected in Canada this
year, as compared with 2,282,970 in
1918. Compared with the five-year
average of 2,385,510 barrels this
is an increase of 50%, making it a
bumper crop.

Homeless entries in the four
western provinces continue to be
well ahead of last year. For the
half year they number 11,329, as
compared with 5,162 in the same
six months period of 1919. Alberta
topped the list with 4,682 homeless.
Saskatchewan followed with 2,811,
British Columbia recorded 373 and
Manitoba 328.

Britain and Canada

Canada is honored at the present time by having among its visitors three notable British statesmen, Hon. J. H. Thomas, Minister of Employment in the Ramsay MacDonald Government; Hon. Winston S. Churchill, former Chancellor of the Exchequer; and Mr. Amery, former Minister for the Dominions. Mr. Churchill and Mr. Amery are in Canada on holiday; but they are more the less closely studying conditions and ascertaining the sentiment of this country in regard to vital questions of Empire policy such as immigration, trade and commerce, and the possibility of closer relationships in matters for the general advancement of both Mother Country and this Dominion.

On the other hand, Mr. Thomas' visit to Canada is made in his official capacity as Minister of Employment with the object of endeavoring to find out up to what ways Canada assist in solving the serious unemployment problem in Britain without doing injury to itself, and, having discovered, evolved ways and means to accomplish this object, to secure the cooperation of the Canadian Government and the Canadian people in carrying them into effect.

Fortunately, the first impression created by Mr. Thomas' mission has been removed. As the minister charged with the task of solving the unemployment problem in Britain, it was felt that Mr. Thomas was coming to Canada with the idea of developing some immigration policy whereby large numbers of British unemployed would be transferred to this Dominion. Anxious as Canada may be to receive such immigrants, the Dominion is not prepared to have thousands of men dumped into the country solely because they cannot find work at home and who have no training or aptitude for life in this land. Mr. Thomas has made it abundantly clear that he has no such intention; on the contrary, Mr. Thomas declares: "It is not my aim to solve my unemployment problem by creating one for you." Unemployment and immigration are, he says, two quite separate and distinct problems and should be tackled as such.

Then what is Mr. Thomas' proposal to Canada? It is simple, clear-cut, workable, and one that should find favor with, and the sympathetic support of the people of Canada. In a word it is that our large Canadian corporations, and our people generally, should, when making purchases buy British-made goods and articles, if such are not made in Canada, in preference to buying from any other country. He has asked the Dominion Government to give encouragement and support to such a policy. He has sat down in conference with the heads of the Canadian Pacific and Canadian National Railways and asked them to follow such a policy; he has said to the officials of the Canadian Wheat Pool: "Britain is the largest purchaser of your wheat. We are your best customer, just as we are Canada's best customer. Thus, when you require machinery or other things which Canada itself does not manufacture and cannot supply, we ask you to buy from us, rather than from others."

This should appeal to the people of Canada as good business. It is a gift-respect proposal for both parties to it. For example, Mr. Thomas points out that Canada imports over 10,000,000 tons of coal from the United States. He wants, and he is going to get, some of that coal business for Britain—Canada's best customer—and thereby assist the coal-mining industry of the Old Land and supply fuel for one of the thousands of unemployed miners there, as well as cargoes for British boats, thus providing employment for British dock hands, sailors, and all and sundry having to do with the business of shipping.

Such a policy will place a responsible chord with the people of Western Canada, who are not particularly favourable to any policy of restrictive tariffs, or other forms of restraint on trade, and who firmly believe that the proper policy for this Dominion to pursue is to offset tariff action by other countries against Canada by further reducing tariffs on British goods and thereby assisting to substitute British-made goods for those of other countries.

The success of such a policy lies largely with the individual Canadian citizen. He can make it a success by stipulating when making any purchase that, first, he must have an article made in Canada, and, if that cannot be obtained, second, that it be British-made. Importers, wholesalers, distributors, retailers, will quickly adjust their stocks to comply with the popular demand.

Leaving all sentiment aside, it is good business for the people of Canada to support and buy from their best customer. The more we buy from Britain, the more Britain can afford to buy from us.

Silver Dollar Out Of Date

Fifty Million In U.S. Treasury But No Demand For Them

The silver dollar has joined the horse and buggy and other remnants of the past and has faded from circulation, while the silver half-dollar is still used in the West, but is going out of use in the East, because quarters are favored for tipping, according to U.S. Treasury officials.

At the present time there are about 50,000,000 silver dollars tied up in the Treasury to back up silver certificates, although they could easily be placed in circulation if there were a demand for them.

New Car For King George

Has Six Wheels and Will Travel Over Roughest Roads

A six-wheeled motor car built to go anywhere on land has been delivered to the King at Sandringham, Norfolk. It is an all-British production designed to travel over the roughest moors and broken ground and even over ploughed land, while it can travel at 50 miles an hour on the open road. The car has detachable rubber exterior tires for really rough ground.

The proposed canal across Nicaragua, to link the Atlantic and Pacific, would be bigger than the Panama Canal.

A new type of lifeboat, recently tested in British waters, holds 300 passengers and is equipped with radio.

Any job is easy when you like it and hard when you dislike it.

Was Victim Of Glacier

Body Of Austrian Recovered After Eighty-Three Years

Eighty-three years ago, Norbert Maltersberger, at the time 32 years old, husband of Magda, and father of Franz Otto, failed to return to his cottage, in the village of Kals, Austria, one day from the woods, where he won his living hunting game. A rescue party from the village decided he had been caught in an avalanche of ice.

Recently Maltersberger came home just as he left that day in 1846. The glacier had given up its prey. Although clean shaven, according to family records, when he left, he had a two-inch beard when a party of hunters found him on the edge of the glacier. The body, clothes, and weapons were in a perfect state of preservation.

Franz Maltersberger is now 86. His father was buried at Kals, while grandchildren and great-grandchildren mourned at his grave.

WHAT OUR GIRLS NEED

When Lange Anemic and Feeling Run Down

When a girl grows languid, dull and irritable when her color fades and she becomes pale, you may be sure that the cause is anemia, or, in other words, that the blood, the color of the blood is caused by the presence in it of millions of tiny red corpuscles. If it is these tiny bodies that carry nourishment from the blood to the tissues. They also cause the glow of health in cheeks and lips. When a girl's blood is deficient, then, red corpuscles her body is under-nourished, her nerves starved, and there is serious danger of a decline. What is needed is an improvement in the quality of the blood, and it is a scientific fact that a course of Dr. Williams' Pink Pills will so enrich and purify the blood that all traces of anemia and its accompaniments will disappear. As an evidence of the value of Dr. Williams' Pink Pills in cases of this kind, Mrs. John F. Plann, a Houston Station, P.E.I., says: "I am glad to take this opportunity of recommending Dr. Williams' Pink Pills. My daughter was in a 'run down' condition; very pale, nervous and much under weight. We tried several medicines, but they did not seem to do her any good, so I decided to give her Dr. Williams' Pink Pills. Almost from the start she began to improve, and after the use of a few boxes she had gained, in weight, her appetite improved and she had a better color to her cheeks—in fact she had fully regained her former good health. I have advised every mother of young girls to give them Dr. Williams' Pink Pills at the first sign of an anemic condition." You can get these pills from any medicine dealer or by mail at \$1.00 a box from The Dr. Williams' Medicine Co., Brockville, Ont.

World Harvest Larger

Wheat Acreage of Many Countries Increased Last Year

Present indications are that the world acreage of wheat to be harvested this year will be larger than that of last year. The 1929 wheat acreage in 21 countries is estimated to be five million acres larger than in 1928. Areas reported in all European countries total 56,562,000 acres, an increase of 1.4 per cent over last year.

Worms in children's work hives. These pests attack the tender lining of the intestines and if left to pursue their ravages unchecked, they will eventually perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Chinese writers state that in the third century B.C., China had wide highways lined with shade trees spaced at intervals of thirty feet.

An Indian spider's web, only six inches wide, was found to contain over 45,000 meshes.

Cramps Diarrhoea Pains in Stomach

Mr. Roy Lightner, Miller's

"I became very ill; lost my appetite, had cramps, diarrhoea, and severe pain in my stomach. I purchased a bottle of Miller's Worm Powders and before I had taken half of it I was completely relieved, and have had no symptoms since. I'm trouble since."

"The Extract" too highly, and will never be without a bottle of it in the house.

"It is pleasant to take and acts very quickly."

"My brother had the same experience with it as I had."

"Dr. Fowler's" has been on the market for the past 84 years; you don't experiment when you buy it. Price 50 cents a bottle at all dealers; sent only by The T. Millburn Co., Ltd., Toronto, Ont.

Wonderful Discovery

Of German Experts

Treatment Given To Living Trees Makes Lumber Partly Fireproof

A thin mineral soup, fed to living trees to make their wood partly fireproof after it has been cut and made into boards, has been invented by experts of the College of Forestry, at Tharandt, Germany. The process is a modification of one invented some time ago to dye the wood of the living tree to any desired color. For this purpose solutions of the desired dyes were placed in holes bored in the tree close to the ground. As the sap rose the dye went with it, gradually coloring the wood. In the new fireproofing process, the dye solution is replaced by a bowl of the new "soup" containing compounds of silicon and fluorine and other chemical elements, so arranged that the solution flows little by little into a hole bored in the tree trunk. As with the dye solution, these chemicals are absorbed slowly by the tree and carried up by the rising sap into every fibre of the wood. The solution is too diluted to damage the living cells of the tree. Instead, its chemicals are gradually converted into mineral deposits throughout the wood, such as happens in the course of millions of years to wood buried in mineralized ground and slowly turned into stony fossil. To carry out this fireproofing process too far in the trees intended for timber is unwise, since the mineral deposits make the wood harder to work. The German experts claim to have succeeded, however, in neutralizing trees just enough to make their wood almost fireproof without destroying its properties as wood.

Might Be Good Idea

Everyone in Japan Compelled To Carry Identification Disk

"Where's your identification disk?" In the near future you may be stopped by a policeman and asked this question. And if you cannot produce the disk, it may mean a police court summons and a fine, says a writer in *Answers*. This may sound far-fetched, but a corner remarked the other day that it would be a good thing if everybody carried an identification disk of some kind, and was informed by a police officer that this was compulsory in Japan. There everyone wears such a disk around the neck from birth onwards. Apart from the convenience in accident cases, it would also be a safeguard against loss of memory, of which there have been many instances.

Sores Eke Before It. There are many who have been afflicted with sores and have driven them away with Mr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this potent remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

Two Diplomats Honored

Several Canadians Also Received Honorary Degree At Dalhousie

America's minister to Canada, Hon. William Phillips, and Canada's minister to the United States, Hon. Vincent Massey, were among the recipients of honorary degrees at Dalhousie University's reunion convocation. Other distinguished men to be honored were Hon. E. N. Rhodes, P.C., Premier of Nova Scotia; Hon. A. K. MacLean, president of the Exchequer Court of Canada; Col. Hon. J. L. Balfour, Minister of National Defence, and Chief Justice A. M. Morrison, of the Supreme Court of British Columbia.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action is gentle, while fully effective is mild.

New Company Organized

Will Manufacture Briquettes From Dried Coal In Souris District

The Canadian Coal Briquettes & Power, Ltd., has been organized by a number of prominent business and coal men in western Canada to manufacture briquettes from the dried raw coal of the Souris District in southern Saskatchewan. Dried lignite coal and powdered fuel will also be manufactured. The Company, it is stated, can save 600 tons of coal in the Souris District with an estimated tonnage of 8,000,000 tons.

Miss Oldslover: If I should lose all my money would you love me just the same?

Mr. Seadunster: Just the same, my dear, only I'd be so busy earning my living you wouldn't be able to notice it.

Kill that corn with Minard's Liniment.

EVEREADY

EVEREADY COLUMBIA HOT SPOT BATTERIES

Unconquered by days of heavy toil. Full of fire for the next tough ignition job—Eveready Hot-Shots have made themselves a national reputation for sheer strength and long life. Metal cases shed water—keep out penetrating damp and save battery power. Look for the name Eveready on each battery—if it's not an Eveready, it's not a genuine "Hot-Shot."

HUNTER-MARTIN & CO., REGINA, SASK.

GREAT BRITAIN'S FOREIGN POLICY ONE OF PEACE

Victoria—Great Britain's foreign policy has never been one of subservience to France, but one of preservation of peace and order. Winston Churchill, former chancellor of the exchequer in the Balfour government, declared here.

He was addressing a luncheon given in his honor, where nearly 1,000 persons greeted him enthusiastically. The gathering was sponsored by the Canadian Club and National Council of Education.

He had gathered, said Mr. Churchill, that there had been tendencies to misrepresent the foreign policy of which he spoke. Britain had ever been at peace, he recalled, that reconciliation between France and Germany was the primary objective of European diplomats and leaders. All other problems were of lesser importance. Through the treaty of Locarno the bringing of these two nations into closer comradeship had been attained.

"We have always been anxious that Germany should resume her place in the family of Europe and that has been achieved. Not that we did that at the expense of the allies with whom we stood side by side during these long war years," he said. "Our policy in Europe has been clear, calm, and consistent."

Britain had very little to do with the Pacific war, he said, dealing with the policy in the east. He had always found his country in the government of Japan strengthened by all its conduct.

In broadening the Anglo-Japanese alliance at Washington to include the United States, the Pacific ocean had been placed in a position of security that did not belie its name. "I think you will agree that our policy in China has been successful," he declared, pointing out that a very difficult period had been passed through and consolidation was now in sight.

Reduce Running Time

Canadian National To Consider Matter Of Increasing Speed From Montreal To Vancouver

Winnipeg, Man.—Immediate consideration is being given to the matter of cutting the running time of Canadian National trains from Montreal to Vancouver in conformity with the proposed cut of 10 hours for transcontinental trains by the Canadian Pacific, as recently announced by President Beatty, according to a statement made by Sir Henry Thornton, K.C.B.E., president of the Canadian National Railways, just prior to his departure for Montreal.

The president was accompanied by Lady Thornton, left on his special train for the East. This marks the conclusion of the Canadian tour of western lines, in the course of which, he said, he had once more had occasion to note with admiration the spirit of co-operation in the west under trying circumstances.

He referred to the adverse crop conditions. While a national disaster had been narrowly averted, the morale of the westerner had not been affected. Nor had the faith of the Canadian National in the west, he added, stating that the plans for expansion which had been in progress would be continued while new ones were being considered.

Valuation Of Beech Property

Holdings Of Pioneer Homesteader At Port Churchill Are Appraised

The Pass, Man.—The heirs of the late Capt. William Beech, pioneer homesteader at Port Churchill, accompanied by their solicitors, have arrived from the Hudson Bay port. The party had gone north to obtain an expert valuation of the property, which is now the subject of exchange court proceedings.

Nothing was divulged in regard to the valuation placed on the 200,000 acres held by the Beech family at Churchill.

The case will come before a court sometime in Winnipeg about the end of the month.

Boat Strikes Whole

Yarmouth, N.S.—Striking a 50-foot whale some miles southwest of Yarmouth coast, the steamer "Yarmouth" only freed itself from the whale later by stopping and backing away from the huge mammal.

From 1885 to 1927 there were 4,266 lynchings in the United States.

W. N. U. 1802

Big Aviation Event Important Race For Aviators May Be Held In Canada

Toronto.—The rapid development of air navigation in Canada during the past few years promises to culminate in an aviation event of this country, which is expected here, will be of importance to the rest of the world. The race for the Schneider cup, now the international classic of Europe.

In view of the fact, as a result of the training received in the war, Canada numbers a considerable body of expert air navigators, and in view of the inevitable training towards international air meets, C. O. Stillman, president of the Imperial Oil Company, has made an informal announcement to the effect that the company contemplates a contribution of \$50,000 for the purpose of promoting an international race to be called "The Imperial Air Derby." This race will begin at some prominent flying center in the United States, and end at a Canadian field, on some date next year to be announced later.

The amount suggested as prize is said to be far in excess of any incentive yet offered on this continent for an air race, and it is bound to attract the regular pilots and the most modern machines not only of Canada and the United States, but of other countries.

Western Air Mail

Service Expected To Commence About October First

Ottawa.—Inauguration of 1,250 miles of air mail service on the prairies is expected about Oct. 1, linking Winnipeg with Canmore, Alta., and thereby saving a day's time between the two points. J. H. Herring, chief superintendent of the Dominion Air Mail Service, is now in the west to arrange for the service. The Western Canada Airways Company, of Winnipeg, which Hon. P. J. Veniot, postmaster-general, plans to go to Winnipeg to officials at the formal opening of the service.

There are two routes planned for the service, it is understood. The postmaster-general's department, the one from Winnipeg via Regina, Moose Jaw, Calgary and Canmore, will be operated by the Canadian National and North Traffic to Edmonton.

From it is indicated, the air mail service will likely be established across the Rockies to the Pacific coast, and the Dominion will maintain a wide air mail service from Vancouver to the Gulf of the Leeward Islands, and the arrival of ships from Europe.

Canada's National Parks

American Visitor Thinks Parks Of British Columbia Ahead Of Those In United States

Washington.—A trip through the Canadian Rockies Mountain National Park has convinced Mayor Ralph Bauer, of Lynn, Mass., that the management and upkeep of the British Columbia parks is far ahead of the American National Parks, which he has also toured. He has written a letter to the governor of British Columbia, and the senator has asked the national park service to investigate.

Mayor Bauer stated that the Canadian roads were better made, and wider and were well oiled. There was no charge for admission and the whole reservation seemed to be run for the people to whom it belongs rather than for concessionaires in an effort to blind the people to the fact dollar possible.

Milk Shortage In Ontario

Toronto, Ont.—Dry weather may bring a milk shortage in Ontario, according to George H. Barr, provincial dairymen director. Toronto milk dealers have been paid in advance in price of one cent a quart. John Carroll, of the Department of Agriculture, states that heavy crop losses may be the result of the drought in the last dollar possible.

Groves Apples In Saskatchewan

Saskatoon, Sask.—Apples that compare favorably in size and taste with those grown in British Columbia, have been produced this year in Saskatchewan. George Pow, of this city, has a two-year-old tree that produced more than 400 good-looking bushy Apples. He also grows cherries and plums in his back yard.

Java Sugar Arrives

Montreal.—With the first shipment of sugar from Java for Canada, in at least three years, the C.N. steamer, arrived at Montreal with 73,000 bags from Tjilatjap, on the south coast of Java. The steamer made the journey in 48 days, sailing from Tjilatjap on July 13.

British Settlers For Coast Province

\$100,000,000 Is Received For Purpose Of Facilitating Same
London, Eng.—The required sum of \$100,000,000 for the establishment of the Empire Development Corporation is assured, according to an assertion by Dr. C. T. Gahrbath, in London newspapers recently—an assertion that is causing much rejoicing in official quarters. Dr. Gahrbath is here in connection with the movement of settlers from the Old Country to British Columbia.

Dr. Gahrbath says it is proposed that the corporation should acquire 20,000,000 acres in British Columbia and settle thereon 20,000 British families.

Premier Tomin has requested Mr. Thomas to send a representative to British Columbia, he declared, "I am only waiting the approval of the scheme by Premier MacDonald, Lord Pausfield, Mr. Thomas and Premier Tomin."

"It is proposed that the governments of British and British Columbia should have representatives on advisory boards and that British and Canadian trades unions also will have representatives. Opportunities to strike would be given to the organizations carrying on empire settlement operations."

CANADA TAKES IMPORTANT STEP AT WORLD COURT

Geneva.—Canada is first among the British dominions in making a declaration of adherence to the optional clause of the world court, which provides for compulsory arbitration of international disputes.

Cheers rang through the Hall of Reformation when Senator Hall Danquand, leader of the Canadian delegation, made his declaration at the tenth assembly of the League of Nations. As he left the tribune, the premiers of both Great Britain and France joined with those offering congratulations.

From Senator Danquand's statement it was clear the Canadian declaration did not come as a result of the recent declaration of Great Britain, or in consequence of Premier Ramsay MacDonald's similar declaration in behalf of Britain. Since the day Premier Mackenzie King, of Canada, and the League his statement of March 10, 1925, that the Canadian government was prepared to accept compulsory arbitration of the Court of International Justice in justifiable disputes, Canada has never faltered. Senator Danquand emphasized.

Other dominions which are members of the League, likewise are preparing to make their declarations of submission, but they still regard the problem of reservations. In an endeavor to reach a common understanding the Dominion's representatives, including the representative of British, Australia and New Zealand, both have reservations. Canada, too, may have a reservation but it is unlikely it will be made as far reaching as those out of the Antipodes. The Irish Free State and South Africa, are understood to be like New Zealand, both have reservations. Among suggested reservations is a provision that compulsory reference to the international court would not apply to disputes between units of the British Commonwealth.

Eighteen Day Trail Ride
The remote Columbia Ice Fields, north of Lake Louise, was the objective this year of the major Trail Ride of the season. These fields are claimed to be the largest body of ice south of the Arctic Circle, covering 200 square miles in area, whose waters flow in to three oceans. Only experienced trail riders are permitted to take this strenuous trip for which they must possess at least the silver button emblematic of 100 miles of trail riding. The trip from start to finish took eighteen days to complete. Picture shows two of the hardy trail riders, W. L. Payne, London, England, and Louis Prevost, of Montreal with Guy Thomas, Brower's guide, on right, together with a section of the Columbia Ice Fields.

VETERAN NEWSPAPERMAN

Remarkable Political Situation In Saskatchewan Ends With Want Of Confidence Vote

Regina.—The Liberal Government in Saskatchewan after a tenure of office of three years went down to defeat on the floor of the Legislature on a vote of want of confidence. The defeat was brought about by the elected representatives of the people. Conservatives, Progressives and Independents joining together on the want of confidence vote.

The official count of the vote was: Opposition, 34; Government, 27. Only one member of the House was absent when the vote was taken, namely, D. A. Hall, the Liberal member for Cumberland.

Mr. Gardiner closed the debate on the want of confidence motion for the Government, and was followed by K. S. Whalley, Progressive member for Kindersburg, who made a short statement indicating the attitude of the Progressive members on the constitutional issues raised, and which they intended to support the motion.

A. C. Stewart, Independent member for Yorkton, followed Mr. Whalley, and stated that the Independent group would also vote for the amendment.

No member of the Conservative group spoke on the amendment, and at the conclusion of Mr. Stewart's speech the Speaker called for the vote.

Trans-Canada Telephone

Line From Halifax To Vancouver To Be In Operation Soon

Edmonton, Alberta.—Within two years a trans-Canada telephone line will be completed from Halifax to Vancouver, and Canadians will be able to talk from coast to coast over an all-Canadian wire, delegates to the ninth annual convention of the Canadian Association of Telephone Exchanges, which met here during their five-day meeting at Jasper recently.

The line, it was explained, with the exception of the section between the two points, will be utilized. Some 72 delegates from every telephone system in Canada attended the convention, and many phases of the telephone business were discussed.

Succeeding Hon. Vernon W. Smith, Minister of Railways and Telegraphs for Alberta, James Hamilton, general manager of the B. C. Telephone Company, Vancouver, was elected president of the association. Other officers chosen were: Vice-President, John E. Lowery, commissioner of the Manitoba Telephone System, Winnipeg; permanent secretary, A. M. Mitchell, auditor of the Alberta Government, Edmonton. Hon. R. B. Bennett in Ottawa

Hon. R. B. Bennett in Ottawa

Returns To East After Five Weeks' Tour Of British Columbia

Ottawa, Ont.—Hon. R. B. Bennett, opposition leader in the House of Commons, returned to the capital from a five weeks' tour of British Columbia, in the course of which he visited more than 60 addresses.

The Conservative chief returned more impressed than ever with the achievements and possibilities of the province, and the future of the province. He said, however, the failure of the present government to provide adequate protection, improving the fruit growing districts, where, he said, the growers, unable to find home markets, were sending carloads of fruit to the United States on consignment, willing to take any price.

Gardiner Government Goes Down To Defeat

Remarkable Political Situation In Saskatchewan Ends With Want Of Confidence Vote

Regina.—The Liberal Government in Saskatchewan after a tenure of office of three years went down to defeat on the floor of the Legislature on a vote of want of confidence. The defeat was brought about by the elected representatives of the people. Conservatives, Progressives and Independents joining together on the want of confidence vote.

The official count of the vote was: Opposition, 34; Government, 27. Only one member of the House was absent when the vote was taken, namely, D. A. Hall, the Liberal member for Cumberland.

Mr. Gardiner closed the debate on the want of confidence motion for the Government, and was followed by K. S. Whalley, Progressive member for Kindersburg, who made a short statement indicating the attitude of the Progressive members on the constitutional issues raised, and which they intended to support the motion.

A. C. Stewart, Independent member for Yorkton, followed Mr. Whalley, and stated that the Independent group would also vote for the amendment.

No member of the Conservative group spoke on the amendment, and at the conclusion of Mr. Stewart's speech the Speaker called for the vote.

Infantile Paralysis In East

Quebec Schools Delay Opening On Account Of Outbreak

Quebec, P.Q.—An outbreak of infantile paralysis in this district, it was decided by the Protestant Board of School Commissioners to postpone the opening of schools until Sept. 16. Schools in this city generally open the first week in September.

Dr. Alphonse Lesard, director of the provincial hygiene department, announced that the department was not in a position to supply convalescents of combat the disease, but in the event of urgent need would endeavor to secure a supply of the vaccine.

GOOD PROGRESS IS SHOWN IN GARNERING CROP

Ottawa.—Crop reports received from the three prairie provinces indicate excellent progress in the harvesting of the wheat crop. The bulletin issued by the Dominion Bureau of Statistics contains reports from the agriculture departments of Manitoba, Saskatchewan and Alberta.

The crop is practically all cut in southern Manitoba, and threatening about 50 per cent. done in that part of the province.

A few fields still stand in the north. Splendid progress has been made with harvesting in Saskatchewan, where 75 per cent. of the wheat has been cut in Alberta, 60 per cent. of the oats and barley, and harvesting weather has been very favorable. Light frosts in scattered districts have done no harm to the Alberta crop. Estimates of the yield vary.

In Manitoba wheat averaging from five to 25 bushels is reported. The average in Saskatchewan is nine to ten bushels.

The report for Saskatchewan follows: Splendid progress made with harvesting operations. Wheat cutting nearly completed and about 75 per cent. of coarse grains.

From the Dominion experimental station at Carleton Place, 30 per cent. of threshing done; average nine to 10 bushels. Small amount of oats and barley threshed. Oat crop much better than for years past. Yield poor.

Winnipeg.—Western Canada's farmers, during rest over the holiday week-end, sent marketing figures for Monday and Tuesday (Sept. 2 and 3), to a high total. Figures from Canada's two great railways showed that marketings for the two days reached a mark near 1,000,000 bushels.

On Canadian Pacific Railway lines 4,572,000 bushels were piled into bins ready for shipment, and Canadian National Railway points marketed 2,127,000 bushels. Storage at Vancouver and at the head of the lakes rose to 4,428,726 bushels and 5,629,000 bushels, respectively.

Storage in country elevators increased 756,000 bushels. Grain elevators in the west have been moving through terminals east and west.

THE SITUATION IN PALESTINE IS MORE SERIOUS

Jerusalem.—Moslem Arabs throughout the Holy Land and the bordering areas are being called upon by highly inflammatory propaganda to revolt and move against the government of Palestine.

Floods of propaganda material were said to have emanated from Jaffa, Haifa, Egypt, Damascus, Beirut and Aleppo and have been instrumental in the smouldering or renewed discontent which some regard as portentous.

One of the provocations in circulation among the Arabs heralded a "holy war" and called upon all Arabs to help Arab insurgents in Palestine, whose condition was described in the blackest terms.

Although Jerusalem was quiet, British troops continued their incessant clashes with bands of tribesmen who have penetrated the Palestine borders.

Despite official denials, that skirmishes with Bedouins have occurred near Beer-sheva, in which six native Christians have been killed.

Jews, who held the first proclamation of the high commissioner, Sir John Chancellor, as adding and abetting their cause, were not so joyful over a second proclamation by the high commissioner, which announced constitution of special committees under British judges to try the criminal cases among both Jews and Arabs, growing out of the recent disturbances.

London.—The situation in Palestine continues grave in communities where no troops have been sent, according to advices received by the Exchange Telegraph agent in Cairo. Aeroplanes have killed five and wounded 20. No British electricity company and the Jewish bank.

Following the repulse of Bedouin tribesmen by British forces near Beer-sheva, the British forces have repulsed Arab forces endeavoring to attack Tiberias, and Arab losses are believed to be heavy.

Would Ask For Assurance

Premier MacDonald Should Have No Political Worries When He Visits States

London, Eng.—Discussing Premier Ramsay MacDonald's statement at Geneva, that he might possibly interfere with his trip to Washington, the Liberal newspaper, the Star, suggested that the Premier, before he leaves, firm assurance that the exigencies he fears will in no way prevent him from going to Washington it will not be as the leader of the Labour government, but as the spokesman of the whole nation on the vital issues concerned.

Speaking of the possibility of his trip, the Premier pointed out the difficulty of the leader of a party without a clear majority being out of the country while parliament was sitting.

Returns From Arctic Trip

Steamer Boathack Back From Eight Thousand Mile Voyage

North Sydney, N.S.—The smaller "Boathack," a 1,000-ton steamer, which has been on a voyage of eight thousand miles, and six weeks of threading the eastern archipelago of Canada's Arctic sea, arrived here today.

Scientists and the evidence of their discoveries in the north, welfare workers among the Eskimos, and members of the Canadian Mounted Police, back to civilization from their patrol of the world's loneliest heat, were on deck when the Department of the Interior's all-purpose supply boat docked here.

Among them is D. S. Super, Canadian government geologist, who will be in Ottawa the first blue goose ever sent by man.

Invitation For Ramsay MacDonald

*Washington.—The American Federation of Labor will invite Premier Ramsay MacDonald to attend its 46th annual convention, to be held in New York City, on October 7, if it is found convenient for Mr. MacDonald to do so.

Growth of Canada

Member Of New York Stock Exchange Sees Great Future For This Dominion

In a recent issue of their monthly survey, a well known financial house, members of the New York Stock Exchange, states in part:

"Canada has been called one of the most fortunately situated countries in the world. Possibly the best evidence of this is to be found in the steady growth during the past several years in agriculture, mining, forestry, power, railway earnings, foreign trade, bank deposits and in the maintenance of a high standard of living at a low cost. The gains in industry and trade are in many respects comparable to developments in the United States at the turn of the century.

"Closework regarding the future development of Canada, may, as was the case in the United States, be far ahead of the actual facts. The general impression that Canada is capable of development only over a narrow strip is not tenable. Northern Canada is an amazing country in future wealth. Gold and silver, iron, copper and nickel deposits are extensive, and the territory subject to future development is vast. The north country is not too far from settlement goes, but it is far from adequate development.

"Although the population of Canada is still under 10,000,000, she maintains a high place among the leading commercial nations. No country exports a greater amount of wheat, newspaper paper, nickel and asbestos. In the export of the flour Canada holds second place, and is third among the nations in the export of wood pulp. In addition, a high position is held in the export of such staple products as lumber and timber, fish and meat products, cattle, hides and leather products, raw fur, copper, gold, lead, etc."

A Never Ending Task

They Tree Creeper Works His Day Every Day

It is most entertaining to watch a tree creeper at work. These little birds are noticed by a naturalist some time ago, working on a great old elm, half smothered by strangling ivy. This they had usually begun its performance at the bottom of a tree, creeping round and round like a spider. The tree creeper is made in short, jerky movements, with constant stops to pick out insects from the crevices of the bark. The one under view completed its spiral ascent in about two minutes. Naming the insects obtained would be rather a difficult task, because some of them are too small to be seen without the aid of a magnifying glass. On arriving at the top the acrobatic climber flew down to another tree and commenced climbing again. It is a never-ending task performed almost in silence. It appears to climb all day long and every day.

Satisfied With Treaty

Premier Mahmoud Pasha, of Egypt, recently returned from London, addressing 7,000 Egyptians at Alexandria, said that the new Anglo-Egyptian treaty signed the 22 years of mutual misunderstandings and suspicions between Egypt and Great Britain. He prophesied that Britain, in a few years would remove entirely her troops from the Suez Canal.

Then there was the tactful hotel manager who removed the sign, "Have you forgotten anything?" from every room of his hotel during the week of the Plumbers' Convention.

A bookmaker charged with biting a policeman, said that he did not know that it was a policeman.

Four bookmakers better to test coppers by biting them.

"You are a comic!"
"Yes."
"Married?"
"Yes."
"Then you are a tragic-comic!"
Hummel, Hamburg.

W. N. O. 1902

How Fashions Change

Bizarre Costumes Affected By the Good People of Sixty Years Ago

At the opening of the Victoria Fair not long ago, Premier Teitmeyer recalled the first fair he had there, 48 years before. The ladies then wore crinolines, and small, neat bonnets tied under the chin with a wide ribbon. Daily little parades were held continuously over the shoulder. Their movements were slow, graceful, charming. If they hurried, the frilled lace edge of a parasol flapped for a moment round a dainty ankle.

The men's costumes were also bizarre. It was the halcyon age which gave the world the stove-pipe hat; a real stove-pipe shape with narrow edge. Full beard and whiskers were in vogue. For Mr. Gilette had not yet brought his gift to mankind. Some of the young bucks shaved the chin, but made up for this nakedness by sweeping Dutch-drears. High, stiff collars of stock surrounded the necks of gaudy coats; coats were mainly black, but often a bright blue or crimson, with large brass buttons. Gentlemen's pants were pulled up with the help of a shoe-born, braced up high, and also fastened under the instep.

Nowadays the Victoria fair grounds are crowded with no such sights. We are more modest. Madens with wind-blown hair have been replaced by a wisp of a sleeveless dress and a wrist watch wander about among the daisies accompanied by youths in collarless, breeches shirts. The jumpy acres of violently checked plaid-pants and hose that look absolutely above suspicion and mention, where they were worn.

Fashions change, but the window-bobs and the jazz jumpers take the place of the crinolines. The fat lady, the tattooed man, the human midgets, the sword-swallowers, and the fortune-tellers as did the crinolines and stove-pipe hats of sixty-eight years ago.—Free Press.

Superstition Is Common

Nearly Every Person Has Ideas About Good and Bad Luck

A woman recently died because her superstition would not allow her to call in a doctor on Friday. Saturday was too late. That superstition is still alive, is to some extent proven by the fact that hundreds of thousands of people still consider that it is unlucky to walk under ladders. That it is unlucky to spill salt. That three candles on a table bring bad luck. That crossed knives spell unhappiness. That to cut one's nails on a Friday is to court disaster. That the new moon seen through glass is an evil portent. That to open an umbrella in the house means misfortune. Similarly, how many Londoners do not believe that it is lucky for a bride to wear a red, white, or blue dress, or that to fall upstairs spells a wedding? The war-time superstition of three lights from a match is still believed. There are probably several million people in England today who exclaim "Touch Wood" on the slightest provocation. In the country villages of England, the inhabitants firmly believe that to see a white horse means the presence in the vicinity of a red-haired girl, who is a cross-eyed widow, or is still an object of suspicion to be combated by crossed fingers and a whispered incantation. Sailors and Irishmen are unanimously averted piece of place among believers in the superstitions, nevertheless the Londoner is hard to beat.

Mining In Northern Saskatchewan

Diamond drills will soon be working on the Mammoth group of claims in Northern Saskatchewan. It is reported that the major portion of the equipment has already been moved onto the property which was long optioned by Consolidated Mines. The Mammoth group is situated about 35 miles northwest of Stanley Mission on the Churchill River.

Increase In Air Mail Carried

Canadian Colonial Airways carried 12,650 pounds of mail during the month of July, which is a slight increase over June figures. During the second quarter, the total carryings southbound from Montreal to Albany amounted to 4,967 pounds, though the northbound movement from New York was in excess of this figure.

The Knicker Way

Visitor—Where did you get that fur coat?
Hostess—I got it in a swimming contest—we had to swim across the lake, and I did it in three hours and a half.

Visitor—You poor dear, I only wear fur three minutes and my husband bought me a complete set of furs!

NEW BOARD OF GRAIN COMMISSIONERS

The photographs here show the new Board of Grain Commissioners just appointed. They are: (1) Hon. Charles Magill Hamilton, former minister of agriculture for province of Saskatchewan; (2) E. H. Ramsay, chairman, general manager of Canadian Wheat Pool, with headquarters at Winnipeg; and former banker; and (3) Prof. Duncan A. MacGibbon, professor of political economy of University of Alberta, and outstanding economist in western Canada, graduate in arts at McMaster University.

Doctors Say "Canad"

Food Is Wholesome

Research Shows It To Be As Good As Without Help From United States Of Europe Will Not Materialize

As When Fresh

In the minds of many people there is an old-established prejudice, to some extent fostered in the past by the medical profession, against the consumption of tinned foods, on the ground that they are productive of some form of poisoning or microbe poisoning. As a matter of fact, there is really no risk at all. More recent medical opinion has emphatically and authoritatively declared, after exhaustive research, that whatever may once have been the case, modern methods of canning are so perfect that tinned foods are just as safe as fresh. The case for tinned foods as wholesome and nutritive articles of diet is, in fact, definitely established.

Originated Income Tax

Dr. Henry Becke, An Oxford Don, Is Responsible For the Idea

It is a curious fact that income tax was "invented" by an Oxford Don. Dr. Henry Becke, a fellow of Oriel College, who afterwards became Dean of Bristol, Becke was Professor of Modern History at Oxford, though his real forte was finance, and he frequently assisted Vansittart with the Budget, during that statesman's long tenure of the Chancellorship of the Exchequer. Disgraced tax-payers will learn with grim satisfaction that Dr. Becke came to a bad end. He died in exile at Torquay, whether he had fled for refuge from the "Bristol riots" at the time of the first Reform Bill.

Gypsum Industry Growing

The continued activity in the building trades throughout the whole of Canada finds reflection in the demand for gypsum building materials and in consequence the gypsum industry in Canada is showing excellent progress.

She—The World Is Full of Rascals

This morning the new iceman gave me a counterfeit half dollar.
He—Where is it, my dear?
She—Oh, I've seen it. It's in the gutter. What about going out of doors without an umbrella?

Fetes Golden Wedding

Captain James W. Troup, manager of Canadian Pacific British Columbia Coastal service, last month celebrated at one and the same time his golden wedding and the semi-centenary of his debut in British Columbia navigation. He is the eldest of three seafaring sons of Captain W. H. Troup who commanded ships between Panama and San Francisco in the fifties of the last century. James W. Troup was the first white man to navigate the Canadian Pacific and has been every position on shipboard before he was in times of war on the British Columbia coast. Photograph taken of him and Mrs. Troup in the gardens of their home in Victoria.

Shipping Crates For Hogs

Method Of Constructing a Strong and Rigid Crate

The experimental farm ship out a great many hogs for breeding purposes, using individual crates in most cases. In his report for 1928, published by the Department of Agriculture, at Ottawa, the Dominion Animal Husbandman describes the method of constructing a strong and rigid crate that is light and weight. The size of the crate for hogs of different weights are: for hogs up to 75 pounds, 9 inches wide, 2 feet high, and 2 feet 2 inches long; from 75 to 100 pounds the dimensions are to be increased to 10 inches in width, 2 feet 2 inches in height, and 3 feet in length. Hogs from 100 to 150 pounds require a crate 1 foot wide, 2 feet 2 inches high, and 3 feet 8 inches long. From 150 to 200 pounds the width should be 1 foot 2 inches, the height 2 feet 2 inches, and the length 3 feet 8 inches.

In constructing a crate it is first necessary to nail the floor firmly into the two side rails, then assemble each side and attach a top rail and nail in one end. The other end should consist of a removable gate set into grooves. Cross pieces of the placed across the top binding the two sides together. Spruce or pine is satisfactory wood to use. The floor should be 2 inches square and of the required length, and the lower slats on each side and on the end should be 1 foot wide, the height 2 inches, and the side slats should not exceed 2 1/2 inches. These are bound together with two uprights, or stanchions, and a crate 3 feet may be placed in the centre.

The crate may be constructed entirely of slats, material five-eighths of an inch in thickness, but for economy slats on each side wider boards up to 8 inches may be used according to the experience of the Dominion Animal Husbandman.

Will Hardly Be Successful

Scotsmen Trying To Revive Popularity Of The Kilt

Patriotic Scotsmen are reviving an old-time plot for popularization of the kilt, the ground of national economy. A peer, writing to the British press, claims to have won the same kind of effort and on for 30 years, and he has been working for it ever since. Other contributors assert that the kilt will outlast many pairs of trousers, and the chief objections of opponents are confined to the difficulty of finding suitable headgear—straw hats, derbies, silk hats and felt being declared unsuitable for the purpose. No one seems to have taken the price of the kilt, the appropriate headgear with the Highland garb, and yet it comes nearest in easiness of maintenance. Fashion expects that youths are trying to interest their elders in going without head covering at all. It is hardly expected that the champions of the kilt will gain much support outside their own circles. As an everyday dress the kilt has few advocates, except as a regimental or picturesque garb. Before the steam engine, the automobile and the aeroplane, the kilt was a success and took the rigors out of travel the kilt had claims which could not be denied.—Christian Science Monitor.

Animals As Swimmers

Tigers and Pigs Are Quite At Home In The Water

The animals which fall as swimmers, we are told, are camels, giraffes, llamas, monkeys and kangaroos, but the first two can manage, if their balance is preserved by a boat. Monkeys are often fond of paddling. Kangaroos jump about in the water and will drown a bather if they can by leaping on him. Contrary to the tradition of centuries, pigs are at home in the water, and in times of flood have been known to swim for miles. Among the land animals the tiger stands out as a first-class swimmer.

Sure To Follow

The cabbies were having their sandwiches eaten at lunch time. Said the first, "there's one thing about you, Albert, I'd have always thought was rather odd."

"O," said his friend, "Yus," continued the other. "You alius tucks yer 'orse up on the right side, why don't you give 'im one on the left side now an' again for a change?"

"I dunno," replied his friend. "But it don't matter much, 'cause I've been long as I get one side again the other's pretty sure yer toller!"

In one of London's hospitals last year 127 miles of bandages were used.

The orange crop of Brazil is gaining in importance

Grading Flour For Britain

Marketing Under Distinctive Marks Would Increase Demand Is Opinion

The markets branch of the Saskatchewan Department of Agriculture is advised that the opinion of millers, bakers and agriculturists is that the grading of flour in Great Britain, the definition of national standards of quality, and the marketing of supplies of standard qualities under distinctive marks would improve the demand for English wheat flour.

It is proposed, therefore, to introduce a scheme for the voluntary grading and marketing of English wheat flour under the Agricultural Products Act, 1923. The national mark will also be used with a grade of standard quality and a trade committee consisting of growers, manufacturers and distributors has been named by the Minister of Agriculture for Great Britain.

A registered picker (miller) must also have his business premises and all equipment, and records to be inspected at any reasonable time by any officer appointed by the minister of agriculture, and when national mark flour is being milled or packed, must allow such officer to be present and take sample of wheat going forward to be milled. The scheme will come into operation on October 1, 1929.

Filming Interior Of Buckingham Palace

Will Be Used For Picture Dealing With Empire Fur Trade

Huge are lamps, cameras, and all the paraphernalia of the moving picture have been taken into the palace, where, for the first time in history, interior scenes are being filmed. These will be used for a moving picture dealing with the empire fur trade.

The film will depict a small boy who is taken by a fairy prince to the king's palace. The royal chef is seen stirring a gigantic Christmas pudding, made entirely of empire products in the royal kitchen. Work on the film is still in progress.

Pictures will be taken shortly inside the magnificent gold and scarlet throne room and the other state apartments. When the film is released the public will have its first opportunity of seeing the interior of the state apartments.

Almost the only section of the palace which will not appear in the film are the private apartments of the king and queen.

Special permission was given by the king for a British film dealing with the empire fur trade to be made inside the palace during the absence of the court at Sandringham. When the film is released, the king desired that the filming should proceed, according to arrangements.

World's Loftiest Capital

Bolivia City Built On Mountain 12,470 Feet Above Sea Level

La Paz, Bolivia, where the people are demonstrating against Paraguay, is the loftiest capital in the world, for it stands on a mountain top 12,470 feet above sea level. This is 2,000 feet higher than Quito, in Ecuador, and 5,000 feet higher than Mexico City. Its nearest rival for height is the far distant Lhasa, which stands at an altitude of 11,850 feet. The mean temperature of La Paz is 50 degrees Fahrenheit. But the cold nights are unrelieved by fresh air, as the folk have nothing to burn, neither coal nor trees in the desolate mountainous regions around the city.

Rastus—Here's dat quahh Ah

borrowed from yuh last year.

Sambo—Yuh done kept it so long Ah don't know if it's still viable for me to change mah 'pinion of yuh jes' to two hats.

The moon's actual color is brown, astronomer's believe.

"That must have been very good whiskey Jones gave us last night because there was a little of it."—Karkitans, Oslo.

Vision of Mineral Wealth of Western Provinces Is Seen From Initial Development

Speaking of the immense possibilities of the northern parts of the provinces of Quebec, Ontario, Manitoba and Saskatchewan in the production of mineral wealth, Dr. C. V. Coates, in an address to the Winnipeg Board of Trade, recently stated that Canada would never be appreciated until the people learned to turn their eyes to the north, for it is there that they will find the largest quantities of that without which the progress of civilization would be sadly hampered, if not halted altogether, namely minerals.

Minerals form the basis of progress today, for the material side of our modern scientific civilization depends for its progress on man's increasing knowledge and skill in their use. And as the steady economic success of modern nations are largely conditioned on their successful exploitation of mineral wealth, the world's growth in population may be controlled by its hitherto resources, man must be fed and clothed before he may advance, but the material progress is measured rather by man's growing success in shaping its mineral resources into forms to suit his own purposes.

With the opening of the vast mineral-producing areas in the northern part of Manitoba and Saskatchewan, through the work of the geologists, comes a partial realization of the potential wealth contained in these two provinces in districts hitherto thought to be of little value beyond the timber and furs. The discovery of the presence of mineral-bearing formations in the rock gives promise of another mining area such as has been developed in Northern Ontario.

Nothing could bring greater benefit to the agricultural industry of the West than the development of a flourishing mineral industry, with its large number of circulating capital, energizing the economic system in all directions. Such sound development would provide a ready market for the products of the farmer, who is now so seriously hampered both by the remoteness of his market and by the limited variety of those products which can stand the present long transportation cost.

One would expect, therefore, the activities of western towns and cities more than the opportunity to supply the many other needs of a flourishing mineral industry and of its numerous workmen and staffs, who are like the farmer must purchase one hundred per cent of their daily needs. This country's greatest economic need today is more balanced industries, the creation of internal exchange of goods by the development of more varied industries, a happy condition which will never be fully enjoyed until there is set in motion a long chain of industries having their starting point in the minerals of the earth's crust.

As in the case of Northern Ontario, some of whose greatest mineral deposits were discovered only when the railroad was being pushed through, the wilderness railway system in the west is leading Manitoba and Saskatchewan to the discovery of still further deposits of potential wealth, some of which are already being converted into actual cash by those in charge of the development. Then, too, the more the lines of steel are pushed ahead in this country, the more of it is made readily accessible to the prospector and still more accessible to that just as important person, or persons, the promoter who develops what the prospector has found.

Before the end of 1928 an eighty-eight mile branch railway, which was essential for the development of the area, was completed from the Hudson Bay Railway. The mine plant under course of construction and

which will take about four years to complete, will include flotation mill, with cyanide smelter, copper smelter and electrolytic zinc plant. It is expected to mine and treat 3,000 tons of ore a day. Hydro-electric plants and transmission lines will also be erected and it has been announced that the Island Falls area on Churchill River will be utilized at a later date.

In 1915 on the north-west arm of Schist Lake, and about four miles south-east of Pin Point Lake, another discovery was made. A year later diamond drilling disclosed an ore body of about 20,000 tons of massive chalcopyrite, averaging about 20 per cent copper and additional gold and silver values of \$5 a ton, and about 180,000 tons of lower grade copper-sulphide ore.

Very soon after its discovery, this property was taken over by a company. During the year this company took advantage of the high price of copper and the richest part of the ore was accordingly mined out and shipped to a smelter at Trail, British Columbia, for treatment. Although involving unusual transportation costs, 25,000 tons of ore were moved from 1917 to 1920 inclusive. The value of this copper exceeded \$2,000,000, and the recovered gold and silver values a large figure.

Prospectors in 1914, working eastward from Anisk Lake and westward from Hudson Bay Railway, discovered many indications of free gold in quartz veins occurring on the shores of Wokoku Lake, also known as Schist Lake. Numerous claims were staked and considerable development resulted. Number of companies were formed.

Many important discoveries of minerals in all parts of this great belt have followed the spreading out of the prospecting, and scarcely a day goes by without a new discovery. One of the biggest, or possibly the biggest ore body yet found, is the Sherritt-Gordon copper-dior deposit on Cold Lake, otherwise known as Kississippi Lake, about forty miles north-east of the Pin Point.

Development to date has definitely placed this property in the big mine class and an offshoot of the Pin Point branch railway is expected to be constructed during this year from Sherritt-Gordon to the mine, a distance of about forty-two miles. Arrangements for the construction of a 1,000 ton concentrator were recently announced which, it is expected, will be ready for operation by January, 1931. Production from the Sherritt-Gordon is only a matter of time, a strong company having been formed to carry out the development.

So the justified rush to the North has opened up an area which seeks the hand of friendship from the South.

Will Develop Amber Deposits

Amber and Ochre Beds in Northern Manitoba To Be Worked

A new branch of mining in northern Manitoba is a likelihood now springing with the announcement that a syndicate will develop the ochre and amber deposits at Cedar Lake. The company is known as the Chairland Syndicate, and operations are expected to start this winter.

Staking of properties will be completed by the fall. Adequate finances are in sight for the development, it is stated by officials of the company.

Delay in operations has been caused by the fact that there are no regulations governing the dredging of amber. It is understood that the syndicate is progressing satisfactorily in its negotiations with the authorities and that dredging licenses will be granted.

Surveys have shown that the major part of the bed of Cedar Lake is composed of an amber deposit, the result of the decay of an ancient forest. A point and varnish firm in the United States has been investigating the possibilities of the ochre deposit, and a deal for the sale of the output in northern Manitoba is probable.

That Kind Of A Loan

"A Kathleen Mavourneen loan?" questioned a judge in an Irish court. "What in the world is that?" "That's what we call some loans in our parts," the witness replied. "They are the kind that may be for years and it may be for ever sort."

Arkansas, Florida, Mississippi and South Carolina are the only four states in the Union without some measure of protection for their workers against industrial accidents.

Win Scholarships

Canadian Pacific Railway scholarships covering five years' tuition at McGill University, have been awarded to C. P. Sturdee (left), son of E. L. Sturdee, assistant general passenger agent; and William P. Dunlop, son of John Dunlop, in the pension department of the railway. These young men have both done brilliant work in their respective school careers and closed them by making the highest average in the matriculation examination for entrance to the university. As minor sons of C.P.R. employees they won the right to the scholarships awarded them.

Demonstrates "Safety-Plane"

New Autogiro Makes Perfect Landing

In Series Of Tests

Dropping from the skies in an almost vertical position and landing as gently as a feather floating to earth, the new autogiro "safety plane" of the Spanish inventor, Juan De La Cerva, was put through a series of successful tests at Philadelphia.

The plot made a half-dozen trips and each time came down almost vertically within a few feet of the point from which he started. Thus demonstrating, he said, the ability of the plane to land safely if the motor should suddenly go "dead" while the plane was in flight.

Musk ox and reindeer can live in the same area without interfering with each other's food supply, he caused the food eaten by one is avoided by the other.

Shipping Eggs Via Panama

Trail Shipments From British Columbia Was Very Successful

The shipment attending a small trail shipment of British Columbia eggs to Great Britain last year will result in much larger exports being made this season. Some 12,000 cases have already been booked, and 8,000 cases were packed to leave Vancouver on the Dominion liner "Cragua" via the Panama Canal. W. H. Auld, chief egg inspector of the Dominion Poultry Branch, who visited Vancouver in connection with the shipments by this route, predicts that as a result of the establishment of the British Columbia Egg Pool shipments will shortly assume considerable volume.

Sergeant—"Hey! You can't go in there—that's the colonel's tent!"

Rookie—"Then what have they got 'Private' over the entrance for?"

FASHION

No. 289—New Elegance. This style is designed in sizes 16, 18, 20 years.

No. 308—40 and 42 inches bust measure. Size 36 requires 2 1/2 yards of 40-inch material with 1 1/2 yards of 40-inch material.

No. 280—Flattering Neckline. This style is designed in sizes 16, 18, 20 years. Size 36 requires 2 1/2 yards of 40-inch material with 1/2 yard of 40-inch contrasting and 1/2 yard of binding.

No. 282—Graduation Dress. This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 yards of 40-inch material.

No. 835—Smart Apron and Cap. This style is designed in sizes small, medium and large. The apron requires 2 yards of 36-inch material with 5/8 yard of binding.

No. 1143—Ship Designs and Household Linen. Pattern consists of two ship designs, measuring about 12 1/2 inches wide and 6 1/2 inches high, including the water line, also two motifs for trimming household linen, measuring 12 inches wide and 3 inches high (blue).

The pattern 25 cents in stamps or coins (can preferred). Wrap carefully.

Plans Being Formulated For Canada's Participation In The Antwerp International Exhibition

Canada Urged To Look After Forests

Method Is Criticized By Editor Of Empire Journal

A strong indictment of the forestry methods used in Canada is made in an issue of the "Empire Forestry Journal" by Fraser Story, the editor. After referring to the ever-growing needs of the Empire for soft woods, the writer points out the magnificent white pine forests of Eastern Canada are gone and the lumber industry is now concentrating on the great forests of the West.

"The treatment of old stands and the neglect and abuse of young growth, in spite of the efforts of the forestry agencies, the absence of care in the abstraction of produce and the large percentage of waste come as a check to European forestry," he writes.

"Generally speaking," he continues, "no effort is made to restock cleared areas with profitable species. During logging operations all valuable corners are removed while fire pits always break out in the debris and burn any that remain."

"Valuable coniferous forests are succeeded by practically worthless treeless areas, which are left to weeds. What makes matters worse is the tendency to cut down young trees for quick sale."

"The lack of regard for future crops seems to be principally due to thoughtlessness. Canada will, no doubt, always have a sufficient supply of soft woods to satisfy her own needs, but as an Empire supply she is a failing source."

Plans are now being formulated for Canada's participation on a primary scale in the Antwerp International Trade Exhibition of 1930, which will be the fourth occasion on which Canada has taken part in a French-Belgian Exhibition.

The three previous occasions were at Liege, in 1905, Brussels, in 1910, and Ghent, in 1913. Until recently it was thought that Canada would take a space in the British pavilion at Antwerp, but so important is Canada's growing trade on the Continent, becoming that the Canadian Government decided on participation separate from the British exhibit and in an entirely Canadian Pavilion.

This has been designed by J. O. Turcotte, Canadian Government Exhibition Commissioner, and will take the form of a building 200 feet by 80 feet in the modern style, advantageously situated between the French and British pavilions.

The building will be constructed of steel and reinforced concrete, with special soft roof lighting. The entire decoration, which is a most lavish scheme, is being prepared at the Canadian Government Exhibition Architects' Bureau, and consists of continuous transparent frieze, nearly 500 feet long, with a special illuminated background portraying Canada's productive resources from Atlantic to Pacific. The building will be able to take in visitors from all over the world.

All advertising matter will be published in French, Flemish and English, and all efforts will be centred on presenting Canada as a composite unit and not by individual provinces.

Great Demand At Vergiville Hatcheries For Baby Chicks

Ninety thousand baby chicks were sold from the Alberta Hatcheries, Ltd., at Vergiville this year, all from eggs selected from accredited flocks. This enterprise was started on capital supplied by about twenty local men and is a purely commercial hatchery. In addition to this, they brought in baby chicks from the United States, where they were not in a position to supply. The capacity of the hatcheries is greater than the 50,000 produced each year and with the perfecting of one of their incubators, a home-made product with a 100,000 egg capacity, and the development of their markets, it is probable that the business will develop greatly during the next season.

At present in addition to the 100,000-egg incubator, there is also a 15,000-egg electric incubator. Will J. Gould is operator and manager and the district agriculturist P. H. Newcombe has been an active agent from the beginning of the enterprise.

The chicks are raised as a result of distasteful over the different standards in judging birds and an increasing number of people are turning to the business should be raised to a more business-like proposition having its proper place in farm activities. This could not be done until farm flocks were increased in number and improved in quality. There was little incentive to do this with a standard of perfection as one objective and standard of production as a counter objective or basis.

China Planning Gunboats

The Observer's Shanghai correspondent, in London, reports that British firms are negotiating with the Chinese Government for the construction of gunboats costing several millions of dollars. Although the negotiations have not been completed, it has been arranged for eight Chinese cadets to go to Great Britain to receive instruction in naval architecture.

Aviators Had Hard Time

Had Almost Lost Hope When Rescued in Far North

After living eight days on berries between the God's Lake and Norway House, where they made a forced landing, Dr. Marshall and S. Harrison, Canadian Air Force aviators, are now recovering at Norway House. They were rescued by an air force plane recently when they had almost given up hope.

Their clothing was in tatters and they were painfully weak when found. They were on fire patrol when the motor stalled and landed on the lake, and struggled unsuccessfully the first day in an effort to make repairs. They remained near the machine and on the eighth day their frantic signals attracted another plane to their rescue.

FREE BABY DOGS

WORLD HAPPENINGS BRIEFLY TOLD

Regina was named as the scene of the 1890 convention of the Trades and Labor Congress of Canada. The eastern city defeated Hamilton by 160 to 75 for the honor.

Mrs. Jessie Campbell Ewart, wife of John S. Ewart, K.C., widely known authority on constitutional law and history, died at her Ottawa residence recently.

Montreal proper has now a population of 1,071,007, according to Lovell's Montreal Directory, the 87th volume of which is about to be published. The population of Greater Montreal is 1,224,068.

Vilhjalmur Stefansson, famous Arctic explorer, declares that the northern air route to Europe is the only practical one to develop and predicts that within 10 years' time there will be a daily mail service from Winnipeg to London over the northern end of the world.

The Graf Zeppelin completed its 20,000 mile flight around the world in 21 days 7 hours and 34 minutes elapsed time. Actually flying time of the Graf was 11 days 23 hours and 34 minutes, beating the time of 15 days and six hours made by the United States army world flyers in 1924.

Making Amazing Progress

Use of English Has Outstripped All Other Languages

The amazing growth of the English language, surpassing that of any other during the past 100 years, was illustrated by statistics compiled by a newspaper published at Zurich, Switzerland.

English was spoken by less than 20,000,000 persons in 1830, the statistics showed, while at present no less than 160,000,000 people speak it natively, while an additional 60,000,000 understand it but do not consider it their native tongue.

The newspaper said that the rate of increase far outstripped all other languages and that there is no part of the world where the language is not spoken today.

Army Fights Locusts

Sixty-Five Tons Destroyed By People In Bulgaria

Every man and woman between the ages of 16 and 90 was recently mobilized by the government of Bulgaria to fight an extraordinary plague of locusts which were destroying crops in the Plovdiv District of southern Bulgaria. Fire, smoke, and oil were successfully used in combating the pests, but more than 65 tons of the locusts were destroyed before their depredations were finally terminated.

"Did you cancel all my engagements, as I told you, Smithers?" "Yes, but Lady Millicent didn't take it very well. She said you were to marry her next Monday!"

France has seven million cyclists. It is the most popular sport in that country. An annual distance bike race is one of the big sporting events each year.

The ex-Kaiser is the richest German in the world. He found a way to make Germany pay before the Dawes plan was ever heard of.

A Great Mathematician

Professors Amazed By Rapid Mental Calculation of Young Russian Woman

The world's most marvelous woman mathematician has been discovered in the person of Nina Glogolits, 22 years old, who does in her mind, in from two to 20 seconds, mathematical problems which require hours of expert time to do on the ordinary way, with pencil and paper.

This wonder woman has been discovered after a wide survey, and scientists are amazed at her lightning-like mental calculations. Before a commission consisting of Professor Konevitch and Professor Chizhevsky, mathematicians; Kojnikov, the engineer, and Dr. Kiselev, a physician, Miss Glogolits, in a remarkably little effort, extracted the root in the ninth degree of numbers with as many as 20 digits. Squaring and cubing numbers of 8 or 10 digits seemed no harder to her than the multiplication table to ordinary human.

Her memory is remarkable. She can repeat, having heard them only once, long lists of words in languages she does not know. The commission pronounced this a phenomenon of Russian birth, greater than Arago or other prodigies on record.

May Make Icebergs

Visible At Night

Expert Making Series Of Experiments To Ensure Safe Navigation

Dr. Howard T. Barnes, internationally known ice-engineering expert, was at McGill University for a few days while his experimental ship, "The Ulvira," was undergoing repairs and refitting before starting out for a series of experiments in the Bay of Fundy.

Dr. Barnes stated that he had just completed three weeks of experimental work in the detection of icebergs at night in the vicinity of Newfoundland and Labrador, doing considerable photographic work for further experimental study in the laboratories at McGill.

To develop methods of making the icebergs visible at night is the objective of Dr. Barnes' present investigations. If he is successful, ships will be able to proceed at full speed either in darkness or fog in the vicinity of icebergs without danger of collision. This he hopes to make known, according to the creator of St. Lawrence route to Europe even safer than at present.

Petition For New Judicial District

Very Necessary To The Psa Say Members Of Bar Association

Members of The Psa Bar Association will petition the provincial government to make a new judicial district there comprising all the territory of the province of St. Lawrence route to Europe, according to a decision made at a meeting of the barriars.

It was pointed out that it was of great importance to The Psa to have a judicial district. The lawyers do not ask that a resident judge be appointed, since the amount of work is not yet sufficient to make such a course necessary, but they do feel that, in the interests of the north, a judicial district here is necessary.

When Breakfast Is Ready

Punch's famous advice to those about to get married has been equalled, we believe, by the American publication, "Life," which reports a husband as saying to his wife: "Well, I hear you are getting the toast, so I suppose breakfast is ready."—Toronto Mail and Empire.

First Traveller—I hear they aren't sending any more mail to Washington.

Second Traveller—How's that?

First Traveller—He's dead.

The human body generates enough heat during a day to melt 44 pounds of ice and raise the liquid to boiling point.

The average life of an oil field is about three years.

A butterfly in flight beats its wings nine times a second.

SUNDAY SCHOOL LESSON

SEPTEMBER 15

TEACHING THE LAW OF GOD

Golden Text: "The opening of Thy words giveth light."—Psalm 119:130.
Lesson: Nehemiah 8:1-5.
Devotional Reading: Psalm 119: 97-104.

Explanations and Comments

The Reading of the Law by Ezra, verse 1-5. The first day of the seventh month is the day which from the time of Alexander the Great, has been celebrated by the Jews as their New Year's Day. On this day the Jews assembled in the Feast of Trumpets, which was observed with special rites: see Lev. 23:24, 25; Num. 29:1-6. In the year 445 B.C., on this day (Neh. 7:73), the people of Jerusalem assembled in the broad place before the water gate, and Ezra, the priest and scribe, read to them the Book of the Law of Moses. "In Ezra the title of 'scribe' came to mean 'man of the book.' It is evident that the scribes were the original origin of the clergy of later times."—Dean Stanley. Exactly to what the phrase "the Law of the Law of Moses" refers is a disputed question among scholars. The entire Pentateuch, some believe, legislative portions only of the Pentateuch, others.

Ezra stood upon a wooden platform above the people and was aided thereon by Levites who stood on either side of him. He read the Law in such a sense, so that the people understood the reading. Ezra read the Law sentence by sentence, and briefly expounded it, and then the Levites made the explanation to the people. Men, women, and children old enough to understand listened attentively to the reading from early morning until midday. On account of the heat they had their customary rest in the noon hour. To the reading of the people Ezra added with Amen, Amen (So be it), with a lifting up of the hands, evidently with the palms upraised in supplication for the divine blessing, and then they bowed their heads and worshipped Jehovah with their faces to the east.

The Effect Of The Reading Of The Law, verse 6. "By Ezra's inspiration and under his guidance the Law was now for the first time put before the Jews in such a way as to convince them that it was the most important thing in the world that their lives should be conducted wholly in accordance with its precepts."—A. S. Peck.

Nehemiah the governor, Ezra the priest, and the Levites said to the people: "This day is holy unto Jehovah your God; mourn not, nor weep, for this is a holy day because was the day of the new moon and the day of triumph and joy. Also because of the reading of the Law." "The People Comforted, verses 10-12." In the way of the Law, "I do not think the sweet," counselled Nehemiah, unless you prove it to be so. "I do not think the sweet," counselled Nehemiah, unless you prove it to be so. "I do not think the sweet," counselled Nehemiah, unless you prove it to be so.

New Means Of Solving Crime

Creator Of Sherlock Holmes Speaks Of Impressions Of Mediums

In the well equipped police station of the future a trained clairvoyant would be part of the detective department, according to the creator of "Sherlock Holmes."

Sir Arthur Conan Doyle discussed the possibilities of a clairvoyant or psychometrist helping in the solution of the Rotheinstein mystery and other puzzling cases confronting detectives throughout the world. He envisioned a day when criminals would have to destroy everything used in carrying out crime, otherwise a psychometrist would find clues and hand them to detectives.

"Although I do not think anyone could ever be convicted on the knowledge or evidence of a clairvoyant, I do believe the latter can find clues where the police fail," Sir Arthur said.

"The proper term is psychometrist, the work having nothing to do with spiritism. It is purely a matter of the medium's own latent powers."

Sir Arthur gave as an example the finding of a blood-stained knife. The psychometrist, called to the scene would inform the detective thus: "I have a strong impression of a man with a long black mustache wearing a brown suit."

According to Sir Arthur this would give the detective something to work on, as no matter how subtle the detective was, he could not have received an impression of the man's appearance from seeing the knife.

To Study Empire Timber

With a view to finding new uses and new markets for the timber resources of the Empire, the Empire Marketing Board has approved a capital grant, not to exceed \$100,000, to be devoted to research on Empire timbers at the Princess Rishborough Forest Products Research Laboratory, London, under the direction of the Department of Scientific and Industrial Research.

Germany, the United States, the United Kingdom and France together, exported \$800,000,000 worth of chemicals and allied products in 1928.

Keep Your Farm Up-to-Date This Inexpensive Way

For Farm Homes

Faded or cracked walls and ceilings detract from the pleasure of farm life. Hundreds of farm owners, realizing this, have transformed their rooms into bright, colorful interiors by applying Gyproc over all the old, ugly surfaces—then decorating. Remarkably attractive results are thus achieved at small cost. Every room becomes much more beautiful, livable and up-to-date.

Utilizing Waste Space

Those musty, inaccessible waste spaces in your attic and basement. Why not convert them into extra rooms by erecting Gyproc walls and ceilings? You can have a playroom, a laundry room, a workshop, a special preserving closet or any other kind of room you wish.

For fast, economical, fire-proof construction on the farm there is nothing to equal Gyproc. Write us for information or see your nearest Gyproc dealer.

Barns and Poultry Houses

Gyproc lined barns and poultry houses provide the best protection against fire, cold, heat and vermin that your stock can have. You can erect strong, rigid Gyproc sheds yourself in short time and at little expense. After a few months you will be delighted with the improved health of your cattle and the perfect laying capacity of your flocks.

Fireproof Wallboard

For fast, economical, fire-proof construction on the farm there is nothing to equal Gyproc. Write us for information or see your nearest Gyproc dealer.

In the best package—Clean, bright aluminum

The Singing Fool

By HUBERT PAUL
Copyright, 1924, by Wm. B. Ewing, Inc., New York, N. Y.

SYNOPSIS

Al Stone, the singing waiter and song writer at Blackie Joe's New York night club, is discovered by Marcus, the famous Broadway revue producer. Al insists on helping Molly, the ballet singer at Blackie's, because he loves her. Molly marries him, not loving him, and he pulls her up the ladder of fame. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowing it, is left behind. Molly discovers she is to have a baby. She resists this at first, but is reconciled after little Junior arrives. But when she returns to the stage she loses interest in the child. Her romantic interest, in John Perry, Al's best friend, revived and one day Grace sees them riding in Molly's limousine. She also sees the man put his arm possessively about Molly.

CHAPTER XII

Night on Broadway. The richly dressed limousine crowds had left the theatres and were pouring into the fashionable night clubs. The electric signs on the night clubs blazed, beamed and beckoned. "Here," they seemed to say, "you may find succor from care, here, you may eat, drink and be merry until dawn—if you have the price!" Brightest among those invitations beckoning lights was the brilliant sign of the CLUB BOMBO, where Al Stone was part owner and master of ceremonies. What a contrast to the shabby old place where he had once worked—Blackie Joe's. Al often thought of it. And what a contrast between the job he now held and his old one. Once he had been a mere singing waiter, eager for the tips that the none too affluent patrons of Blackie's place threw him when they happened to like his comic songs and his ad lib wise-cracking. Now he was using his fame as Broadway's foremost song writer to pull the shekels into his pocket at the Club Bombo. He was the magnet, the favorite of the big-time crowds. They called him the "Singing Fool" because he could put his songs over with such emotional intensity. It was a bad word, but it was a very expensive and expensive, designed to hold the huge crowds that flocked there. The tables spread across the room an array of round white tops, with a small cleared space in the middle for the cabaret performers and for dancing. One of the best jazz orchestras in the last furnished music from a raised platform at one side.

It's folly to suffer long from neuritis, neuralgia, or headaches when relief is swift and sure, thanks to Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago. Gargle it with a sore throat. Aspirin is readily identified by the name on the box and the Bayer cross on every tablet.

ASPIRIN
A Bayer Trade-Mark Registered in Canada

"You bet it does!" cried Molly vehemently, and almost breathily. "If I didn't know it I would never have let you come near me."

John Perry smiled. He knew the cool, calculating, ambitious Molly was mad about him. But he was mad about her, too. At that moment his interest had been the lightest of heart affairs, for he was a born philanthropist, but gradually the situation had changed. To his amazement a longing for Molly possessed him; now he found himself willing to do anything to get her. Suddenly she turned to him and said gratingly, "What about my baby—what about Junior?"

But Perry had no answer to that; he merely shrugged his shoulders. He wanted Molly to himself, without any entanglements. Molly gave a tired smile and fixed her gaze on the broad back of the chauffeur, just ahead. How much did that man know of her interest in John?

Her unspoken words were cut short as Perry's arm went around her, and she felt herself drawn rearward. He pulled her abruptly away from the car as she was approaching the Club Bombo.

She quickly snatched a jeweled compact from her tiny bag, gazed at herself in the mirror, patted her disarranged hair back into shape. Her finger tips had been smudged, so she seized Perry's handkerchief, gently wiping off the excess rouge. Meanwhile, the racketeer gazed at her in admiration and crossed her face powder from his top-coat lapel. "You've missed me terribly," "Sorry," replied the importunate Perry.

The chauffeur swung open the limousine door and Molly stepped out. Straight ahead she saw Al in the night club doorway, smiling at her expectantly.

(To Be Continued.)

Farm Incomes Higher

Average Increased By Seventy-Five Dollars in Year
The average cash income per farm in the Provinces of Manitoba, Saskatchewan and Alberta last year was \$2,544, exclusive of the value of seed, feed, meat vegetables and other commodities produced and retained by the farmer for his own requirements. Straight ahead he saw Al in the night club doorway, smiling at her expectantly.

The Oil Of The People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling quality has brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it, and would use no other preparation.

Frequent Text Essential

That a man has passed a driving test with flying colours does not mean that he could pass the same test as successfully ten years thereafter. In the interval he might have suffered from some of the ailments and have acquired more defects which gravely affected his qualifications as a motor vehicle operator.

Ex-Kaiser Wilhelm is still the wealthiest German, his estate being estimated at 500,000,000 gold marks, approximately \$139,000,000.

People like to trade with a good conscience provided it isn't going backwards.

A Friend to Women

The United States leads in civil air transportation so far as mail carried and the number of miles of air line concerned, but Germany is ahead of the rest of the world in miles of airways in operation, number of passengers carried in commercial passenger aeroplanes, and also in pounds of express and freight carried. Canada comes second in number of passengers carried with 74,680, and is third in express and freight. The figures are for 1925.

"Land sakes there, Mary! What's all that noise in the kitchen?" "You don't expect me to break three platters and two cups without making a noise, do you?"

Misrepresenting Canada

Canadian Text Books Need Revamping in Some Particulars

School history textbooks written, edited and printed in the United States for use in Canadian schools have of late stirred some impetuosity in Canadian educational circles and beyond, the argument being quite properly, that Canadian children should not be raised on foreign-made literature which is largely propagandist. Now comes a complaint by no less an authority on the subject he deals with than Vilhelm Stenroos, the Arctic explorer, that books written in Canada, presumably by Canadian authors, misalign Northern Canada. Mr. Stenroos should know whereof he speaks, and attention may be given by the authorities to his observations. One instance of misrepresentation is the explorer's complaint of it that the Canadian textbooks say that the temperature in the northern districts rarely rises above the zero point, and in such districts he points out the mercury rises as high as it does in Winnipeg. Places where trees grow hundreds of feet high are described to Canadian school children as being "barren," while areas where the verdure is so level with that in Southern Alberta are referred to as "places where moss and lichens are found." Mr. Stenroos looks forward to the production of primary schoolbooks in the north as the next development.

It becomes evident that much of the matter contained in school textbooks was compiled many years ago, or, if recently written, was taken from the earlier books, and that the writers have had no opportunity of ascertaining the actual facts. Educationists ought to well to get their heads together, to consider the state of affairs mentioned by the explorer, to remedy where it may be needed and also cure the evils complained of as to historic facts in the textbooks.—Montreal Gazette.

Little Helps For This Week

"Barely the Lord is in this place, I know it well!"—Genesis xxxvii, 36.

Since God doth will that some shall dwell at ease, And others shall know hardiness; This is sure, The lot that fits each nature He fore- And therefore murmur when we must endure. Some day His loving wisdom will be plain As the sweet sunshine following rain.—Mary Bradley.

Do not despise your situation; in it you must rest, suffer and conquer. From every point on earth we are equally near to heaven and to the Infinite.—Henri Frederic Amiel.

Accept your lot as a man does a piece of rugged ground, and begin to get out the rocks and roots, to deepen and mellow the soil, to enrich and plant it!—Henry Ward Beecher.

Where Germany Leads

Has Greatest Number of Miles of Airways in Operation

The United States leads in civil air transportation so far as mail carried and the number of miles of air line concerned, but Germany is ahead of the rest of the world in miles of airways in operation, number of passengers carried in commercial passenger aeroplanes, and also in pounds of express and freight carried. Canada comes second in number of passengers carried with 74,680, and is third in express and freight. The figures are for 1925.

Requires Aid Of People To Be Preserved

If Timber Resources Of Empire Are To Be Preserved

The London Times has issued a warning which should be noticed throughout the British Empire. It declares that the enormous timber resources of the Empire are a rapidly wasting asset. Further than that, it says that unless an end is put to extravagant waste, and new timber reserves created in suitable areas, the day must inevitably come when the world's supplies will prove unequal to the demand. Indeed, the opinion has been expressed by competent authorities that this day is not very far off. The aid of the people is required in this matter; for if the farmers would take advantage of the Canada of the free offers of young trees for plantations, it would help enormously, and why should not municipalities do so too, and earn revenues? One wonders, too, why thousands of acres of waste land in Great Britain are not used for reforestation purposes. This would provide employment for the unemployed and wealth for posterity.

Like a Grip At The Throat. For the throat is not closed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unending dread of its return. Dr. J. D. Stenroos, the Arctic explorer, has a wonderful remedy agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

France Sending Immigrants To Canada

Arrival Of First Actual Settlers From France In Many Years

Heretofore the arrival later, of more than twenty families who are to come direct from France to settle on farm land in Canada, two families comprised some dozen souls reached Montreal, by the Canadian "Alcanzia," to settle under the auspices of the Colonization Department of the Canadian National Railway. The two families who arrived are the first actual settlers to come from France to Canada in many years and they are merely the forerunners of other families who will come out next spring.

The First Alarm Clock

It comes as a surprise to find that the alarm clock appeared more than three centuries ago. A beautiful compendium made in Germany about 1600, indicated the time on a green horizontal face, while the movement of the hand served to strike an alarm. The owners of this remarkable clock must have overslept frequently for the mechanism was far from reliable.

About Town and Country

Alex. R. McTavish, Sight Specialist, will make his regular monthly visit to the hotel at Oyen, Thursday, September 12. Better eyesight service at better prices.

Mr. G. N. McLeod, of Kyle, Sask., arrived in Oyen last Friday, to join the staff of the Bank of Toronto as accountant.

Motorists who are found driving their cars without a driver's license are to be prosecuted. Instructions have been sent out to all A.P.P. to take proceedings against all offenders. Two months having elapsed since automobile drivers were to carry their license "cards", it is figured in official circles that sufficient leniency has been shown and the endurance limit reached.

Mr. and Mrs. H. R. Chaplin left last Friday morning for Saskatoon by motor, where the former attended the annual conference of western managers of the Bank of Toronto, on Saturday. While on route, the were joined at Kindersley by Mr. John Gaw and Mr. I. L. Hay, former members of the Oyen staff. The party returned Sunday, Mr. and Mrs. Chaplin arriving Oyen on Sunday evening. Mr. Woods, western superintendent, and Mr. H. B. Henwood general manager, were present at the conference.

Mr. S. F. King of Edmonton, arrived in Oyen last week and commenced his duties on the staff of the Bank of Toronto.

The Oyen Orchestra will play for a dance in Oyen Theatre on Friday, September 13, after the picture show "The Wolf of Wall Street". All welcome.

Mrs. W. F. Pratt and children who have been spending a vacation at the coast, returned to Oyen last Wednesday.

Mr. Edward Johansen, who joined the staff of the Bank of Toronto here last May, has been transferred to Vanguard, Sask., and left Oyen yesterday.

Mrs. E. H. Church and three children, who have been spending a vacation in Ontario, visiting relatives, returned to Oyen, last Saturday.

Miss Nina Bond, who has been visiting at the home of Mr. and Mrs. Harvey C. Johnson, left for her home in Medicine Hat, yesterday.

FORTY-FOOT GIFT FOR RIDEAU HALL

This totem pole is one of the finest examples of Indian art. Right: Their Excellencies Viscount and Lady Willington and the C.P.S.B. "Princess Narah" on which the first vine-trail bar of the west coast of Vancouver Island was made.

When Viscount Willington, Governor-General of Canada, and Lady Willington visited the West Coast of Vancouver Island on the inaugural cruise of the new Canadian Pacific steamer "Princess Narah" two new epochs were marked for that far-flung corner of the Dominion.

It was the first time that a Canadian Viceroy had ever seen, and in turn, been seen on any rugged coast that is now looming as one of the nation's important industrial and tourist regions; further the arrival of the Narah brought the most luxurious passenger steamer ever to ply in regular service in West Coast waters, now to be the permanent run of the staunch little Clipper-built vessel.

The West Coast had decked itself in gala attire for the visit of the great white chief from Ottawa, tremendous excitement prevailing among whites and Indians alike at the various ports of call. Local interest was heightened by the fact that their Excellencies came formally to the four winds, and entered into the spirit of the many receptions and celebrations with a zest not exceeded by any tourist on the coast. Incidentally Lord Willington intimated after the termination of his voyage that it would not be the last occasion on which he would see that particular part of Vancouver Island.

Loyalty of the Indians, evident at all points touched, was particularly demonstrated at Friendly Cove, historic spot discovered by Captain Cook in 1778, when a lineal descendant of the great Chief Maquinna, who first saw the white man, gathered his tribe, the Nootka Indian band, in the great council hall to greet the viceroy party. It was here that Lord and Lady Willington were recipients of one of the most valuable gifts in the bestowal of the coast Indians, a huge forty-foot totem pole that has stood for years on the sandy shores of Friendly Cove, the envy of collectors from many parts of the world.

Presentation of the totem was touching in its simplicity yet its significance was not lost. Chief Maquinna, head of the Nootka band, descendant of Maquinna, the first to extend the Indians' official welcome, elaborate ceremony which included the famous dance of the Thunder Bird, marking this part of the rites. Later the Indians led the vice-regal party to the site of a huge totem pole standing near the council hall, and Chief Jack, another of the Nootka band, mounted the pedestal to deliver an impassioned oration in his native tongue.

His Excellency stood attentively until the Indian Chief had finished his speech, taking it, probably, for the usual homely words of welcome. His astonishment and that of many of the chief's hearers was great when "Bibi" Lord, well-known industrial leader on the west coast, acting in the role of official interpreter, told His Excellency that Captain Jack had presented the big forty-foot carving as a gift.

Significance of the gift lies in the tremendous value which the Indians themselves place on their historical totems. It would have been somewhat of a small case, one of the men familiar with west coast customs said. If a white man, on being visited by vice-regally, had with one magnificent gesture given away his house and the greater part of his fortune.

Their Excellencies, sensing this, accepted the gift with delight, and announced that plans would be made to have it removed from its present historical setting to Rideau Hall as soon as possible.
